GLP-1 Quick-Start Cheat Sheet

One page. Everything you need to start strong this week.

1 · Print these first

- ✔ Start Here guide, Weekly Log, and Daily Nutrition & Hydration.
- ✔ Add the Injection Site Rotation page and keep it where you inject.
- ✔ Put Provider Visit Notes in the front of your binder.

2 · Your weekly rhythm

- ✔ Each injection day: log the dose + the site you used, then rotate to a new site.
- ✔ Weigh once a week — same day, same time — and note the trend, not one number.
- ✔ Track protein and water every day. Eat your protein first.

3 · Before every appointment

- ✔ Fill in Provider Visit Notes: current weight, dose, and any side effects.
- ✔ Write down your top 2-3 questions so you don't blank in the room.
- ✔ Bring your Symptom Tracker so your provider sees real patterns.

4 · Set your targets (with your provider)

- ✔ Ask your provider for your protein goal and daily water target — write them at the top of each page.
- ✔ Follow their guidance on dosing and nutrition. This sheet is a starting checklist, not medical advice.
